Mezhieva K.Kh. The Chechen moral values as a regulator of social life and modernist processes.

In modern society there is a crisis of moral and spiritual life. It is made an attempt to prove the meaning of spiritual values in stable progress and existence of society. In the traditional Chechen society the neopolitical regulation was made through the system of spiritual values: morality as a means of normative regulation determined people relations and provided the social order with the help of traditions and such social institutes as family, community. In modern globalized world there is a problem for the Chechen to reserve their authentic culture.

Key words: moral and spiritual values, authentic culture, stable social progress, society modernization, society regulations, morality, culture, culture crisis.
