Vakhrusheva E.Ju. On the problem of socialist realism ideas formation

During the formation of socialism, culture presented a certain historical moment of regular artistic, conscious occurrence of a unique culture system. In post-war period art market stopped its existence and could not satisfy the consumer “taste”, all the trends of art activity were under the influence of a common Union of Soviet creative people. This Union controlled the publishing and exhibiting activity and all the trends of art culture activity.

Key words: culture, culture system, socialism, stalinism, Union of Soviet creative people.

Kovaleva N.L. Philosophic and anthropological analysis of religious-spiritual and secular traditions polarization within the development of Russian culture in XVII-XVIII centuries

The philosophic and anthropological analysis of religious-spiritual and secular traditions polarization within the development of Russian culture in XVII-XVIII centuries lets comprehend the world outlook mental component of socially historical subjects' activity and show that the main content of Peter's I reforms was the culture secularization that destroyed the Medieval integrity of ancient Russia culture and cognition. At the same time the church reform contributed the sacralization of the main secular institutions and culture phenomena. It led to the formation of a new and specific phenomenon for the secular culture – “secular holiness”.

Key words: religious-spiritual and secular tradition, Russian culture, reforms of Peter I.
