Koulinich A.P. The problems of the rights protection of borrowers-private people in terms agreement of a credit treaty

It is considered some problems connected with the realization of the rights by private people. It is highlighted that the present legislature system does not take into account some specific aspects of the credit treaty. People who are eager to get a credit as a side in a treaty cannot influence the content of the treaty. Such conditions are set up by the credit organization itself.

Key words: economics, credit treaty, borrower, law.
