***Zolkin E.Ju.* Optimization of social and economic system development of sinter complex of resort and recreation type**

The study aims to develop theoretical and methodological provisions of formation and development of organizational and economic mechanism for the processes of socio-economic development of specially protected health resort and recreational region, metropolitan KMV (CMS), based on the formation of stable reproductive systems, and develop practical recommendations for its improvement. The scientific novelty of this paper is to develop theoretical propositions reflect management features eco-resort region and the development of guidelines for the formation of the ways to improve management of the recreational sector, taking into account regional specificities. The list of priority economic and social problems, allows us to formulate policies to optimize the management development of socio-economic system of sinter complex health resort and recreation. Regional development is not confined only to strengthen the economy in market relations, optimization of management is a priority in ensuring the effective functioning of economic entities.

Key words: region, resort and recreation region, Caucasus Mineral Sources, sinter complex.
