### ***Dzeranov T.E., Dzeranova R.F. Enlighteners and “Christian enlightenment” in Ossetia***

In occurrence of Ossetia in the Russian cultural space there is a transformation of an Osset traditional society. Processes of formation of spiritual culture the Ossetin, degree of influence on them of ideas of Education are analyzed. Participation in these processes of secular and spiritual intelligency. The specific phenomenon investigated in article in histories of the Russian spiritual culture, received name «Christian education of Ossetia», is considered for the first time as a part of socially-philosophical movement of Education. Specificity of the Russian Education, value of the religious factor in its formation and development comes to light. Authors notice, that the imperial government in aspiration to accelerate process of adaptation of mountaineers to new conditions used various methods of influence - from military-administrative, to educational. In Ossetia the policy of "Christian education», spent by orthodox church and got support of the people and figures of national culture has appeared the most fruitful.

**Keywords:** Ossetia, Russia, Education, culture, orthodox church, national intelligency, «educated абсолютизм», transformation.
