***Goverdovskaya E.B. Peculiarities of the regional approach to the system of high professional education in polyethnic space of North-Caucasus federal district***

Regionalization of education – a recognized scientific and pedagogical principle of global education. Relevance of the idea of regionalization is determined by global trends of social and cultural development of mankind. The problem of modernization of higher education in the North Caucasus Federal District is considered taking into account the regional characteristics of the area. A characteristic of linguistic, ethnic, cultural characteristics of the region, higher professional education as a means of reducing social tensions in the region and socialization is discussed.

Key words: modernization of education, the regionalization of higher education, ethnic, and regional aspects of education.
