*(Southern federal university, Rostov-on-Don, Russia)*

### **Professor of Warsaw university P.N. Chernyaev and formation of antiquity study in Don region**

The article is devoted to the scientific works of P.Chernyaev, the Professor of Warsaw university. Despite the fact that his works were devoted to different problems of classical history and philology, the problems of the Roman history were the most important in his works. The author considers his monograph devoted to the works of Roman dramatist Terence to be the main work of the scientist. The author of the article comes to the conclusion that Chernyaev's works concerning the antique history touch upon different problems and its contents is very deep. Due to these reasons his works should be essential for modern scientists.

Key words: P. Chernyaev, antiquity research, Warsaw university, the Roman history, the classical philology, Terence.
