Cultural and linguistic assimilation problems of migrants (by the example of the Volgograd region)

The article deals with the problem of migrants adaptation into socio-cultural space of the various regions of the Russian Federation on the example of the Volgograd region. Ecolinguistic monitoring is suggested as an effective diagnosing method of current language situation. Interview analyses of various categories of migrants living in the Volgograd region is given in the article. Lowering of the quality of the Russian language teaching in the near-abroad countries (according to the migrants' opinion) is established. Main development trends of the migrants' assimilation problem and ways of solving it are shown in the paper. The paper studies difficulties which migrants have during passing the test of Russian Language for citizenship. The author proved not only the language, speech and communicative competence importance in the process of migrants adaptation but also intercultural one.

Key words: adaptation of migrants, multiethnic region ecolinguistic monitoring, intercultural competence, testing migrants.
