

## PHILOSOPHY

***Mikhail M. Shulman***

*(Southern federal university. Rostov-on-Don, Russian Federation)*

### **Training by "hearing words of the teacher» and «imitation teacher»: Filo of Alexandria and the handicraftsman «in a shadow of God»**

Ideas of knowledge on the cognitive line that are alternative to Vitruvian, on materials at its sources – Filo’s of Alexandria treatises – in Precept concepts are considered. The idea could be kept in an elementary form during two thousand years until it woke up to new life in an early capitalist absolutism. Here the handicraftsman acts «in a shadow of God», he «is urged to do» (from here is Luther’s Beruf – *a profession and vocation*) and can use creative knowledge which grants Supreme. This creative knowledge during New Time leaves «a shadow of God» and is realized into technological knowledge. But the understanding of knowledge of what can be given, leads to partitioning of knowledge into teachers, schools that teach «all knowledge», and to disciplines.

Key words: teaching knowledge, knowledge “by ear”, “know how”, technological knowledge.
