Vladimir A. Bugaev, Alexey A. Dremlyuga

(St. Petersburg military institute of national guard troops of the Russian Federation. St. Petersburg, Russian Federation)

Formation of readiness for service and combat activities of future officers of the National Guard troops, through the development of motivation for cognitive activity to technical disciplines

The problem of motivation to cognitive activity is considered from the moment the young man enters the military institute of the troops of the national guard of the Russian Federation up to his graduation. First of all, this manifests itself in low achievement, as an indicator of poor assimilation of the material, and in the subsequent and in the unavailability of the officer to effectively perform service-combat tasks. The ways of solving these problems and improving the preparedness of graduates for service and combat activities are considered.

Key words: motivation, readiness for service and combat activities, future officers of the National Guard troops.
