Special aspects of language in internet discourse of religious style (on Instagram accounts material)

Nowadays religious style is an object of numerous linguistics researches. Especially active there is a discussion about the place of religious style in the system of functional styles of Russian language. Confirmation of its self-contained features appointed the presence of distinct criteria: sphere of usage, aim, language and genre special aspects. That means religious style should have special aspects. Analysis of religious style is often limited by researches of ritual genres as for internet communication becomes more popular and bears mass character. Micro texts that used in social web Instagram let express thoughts, main context in sufficient measures, initiate discussion. That is why study of language special aspects of religious style at Instagram accounts material let clear the question about Russian language style differentiation.

Key words: style, religious functional style, language, discourse, internet discourse, genre.
