The role of educational and didactic material on the specialty language in the formation of the communicative competence of foreign military personnel

The article considers the role of the developed educational and didactic material of the textbook on the specialty language in the formation of the communicative competence of foreign military personnel studying at an aviation technical University. The selection of the material, its organization and application methods are analyzed, i.e. certain conditions that ensure its effectiveness in the educational process are studied. The results of testing the material were obtained in the study of criteria for the level of formation of military personnel's communicative competence in the professional sphere of communication. The practical study proved the effectiveness of the use of educational and didactic material in achieving the goals of teaching the specialty language.

Key words: communicative competence, educational and didactic material, specialty language, foreign military personnel.
