Paper review training of scientific articles based on language speech means of master's degree students of Novocherkassk Institute of Reclamation Engineering

It is described the process of developing the skills of master's degree students in compiling a review of scientific articles and publications on the problem both in Russia and abroad. The researcher identifies the most pressing problems and tasks on the topic of scientific work, systematizes and describes the research results obtained. The characteristic of compiling a literature review from literary sources is given. Students learn how to properly systematize a large amount of sources, express a critical subjective assessment of the previous achievements of scientists, and demonstrate competence skills in the field of study. The literature review indicates the comparative characteristics of scientific research, a list of similar technical innovations, the final part based on the analysis of the results obtained. The results of a comparison of different literary sources make it possible to substantiate the need for an analysis of the selected topic.

Key words: literary review, the problem under study, foreign language communication, critical assessment, scientific research, the plan of a literary review.
