### **Discursive ways of introducing spanisms into English literary text**

It is considered the semantic-stylistic features of the functioning of the spanisms in the text of the novel by Rudolfo Anaya "Bless me, Ultima". Lexical units from Spanish language in the text of American prose act as a special type of inclusions, preserving its grammatical and semantic features. Spanisms in the text perform a special characterological function, and also carry certain cultural-specific information.

*Key words:* bilingualism, structure, borrowing, stylistic, semantics.
