Socio-philosophical analysis of moral aspects in the development of the spiritual sphere of society

The role of the spiritual foundations of society as an important component of culture, values and worldview of people is substantiated. They reflect the basic principles and beliefs underlying social relations that define social and spiritual life, an important element of which are the moral aspects of the development of the socio-cultural environment in society. It is noted that traditions and moral values, which have deep historical roots and are one of the key elements of social development, play an essential role in the formation of these relations.

Key words: personality, identity, culture, morality, ethics, morality, tradition, education.
