### **The specifics of the foreign language education and self-education development in modern conditions of the educational environment informatization**

The features of the modern development of foreign language education and self-education in an information educational environment are considered. The main content of the problem of information development of foreign language self-education is shown, which is disclosed in the following sections: foreign language self-education of the individual, foreign language self-education in the conditions of informatization of the educational environment. It is emphasized that foreign language education has a meta-subject character, which implies the development of integrative qualities and abilities of the students' personality for effective multicultural interaction and professional mobility. The use of information and communication technologies, on the one hand, has a positive effect on the organization of foreign language self-education of a person, since it takes into account and strengthens its integrative nature. On the other hand, digitalization has led to an increase in the importance of health-saving values and a personality-oriented approach in education.

**Keywords:** foreign language education, foreign language self-education, informatization of the educational environment, digitalization of education.
